## GET THE LOOK....

Yes, Spring is here and it's time to "bloom"! We are inspired by the CHARLES PARSONS Folia Collection with some lovely light bright summery prints.

Florals, Stripes and Geometrics to mix and match using some great colour palettes.

For Spring we expect raspberry, yellow, and blue, but we particularly love that the blacks and whites and charcoals and neutrals have been included. It is so refreshing to see these in floral prints.

Go to our [PRINTED FABRICS](#) Category to see the full range.

DON'T FORGET....

Feel free to browse the ranges of our suppliers. Let us know if you would like a quote in something you see.

Let us help you get the curtains you have always dreamed of!

Did you know...

When you buy your curtains online at [onlinecurtains.com](http://onlinecurtains.com) you can opt to **have your tracks sent first**. This means that you can give us the final length of the curtains after you have installed the tracks.

We know it is difficult when you are ordering new tracks to get those last few millimetres correct. If you are using existing tracks, we will send you an email asking all about them. We want to make your curtains exactly right for your track and we will hook them in the correct position as well.

Go to "[How to measure your windows](#)" to see photos of different track types and also how to calculate the final curtain length for each of them.

We want you to be able to unpack your curtains and hang them without any extra fuss.

And from you....

*"I have to admit that I was a little apprehensive using an online site to purchase my curtains. But it has proved to be a very positive experience. Thanks again."*
